

# **DUST CONTROL ON GRAVEL ROADS**

Effective Dust Control involves the application of a liquid chloride solution in early June with a possible second application later in the summer. Under normal conditions this treatment is effective in controlling dust problems through the summer months.

Dust control on local gravel roads is available for any resident, municipality, or township through the following vendor:

Southwest Dust Treatment Inc.  
43709 175th St.  
Springfield, MN 56087  
Phone 507-220-8699 or 507-220-4494  
email: [info@swdusttreatment.com](mailto:info@swdusttreatment.com)

The standard application is 18 feet wide and approximately 400 feet long but can be applied in any length.
