Executive Summary

The Redwood County Highway Department is committed to stewardship, respect and shared responsibility in providing improved, cost-efficient services to all. The Highway Department is responsible for providing a safe and useful transportation system for all users, which is both responsive to community needs and within our program budget.

To effectively maintain and improve the infrastructure for which the department is responsible for, the department prepares a five-year road and bridge plan. The plan is developed by the County Board and Highway Department staff to aid with planning and budgeting, project programming and development and ultimately design and construction of highway and bridge improvement projects.

The plan is then presented to the Public for input and to the County Board for final review and approval.

Redwood County's highway infrastructure consists of 510 centerline miles of road, 130 County bridges and 150 Township bridges. The county highway system is categorized by funding source. The County State Aid Highway (CSAH) system, a network of key highways, consists of 391 miles of the system, of which 85% are paved. County Roads (CR) consist of 119 miles of the system, of which 98% are gravel. Of the 510 mile Redwood County system, 333 miles are paved.

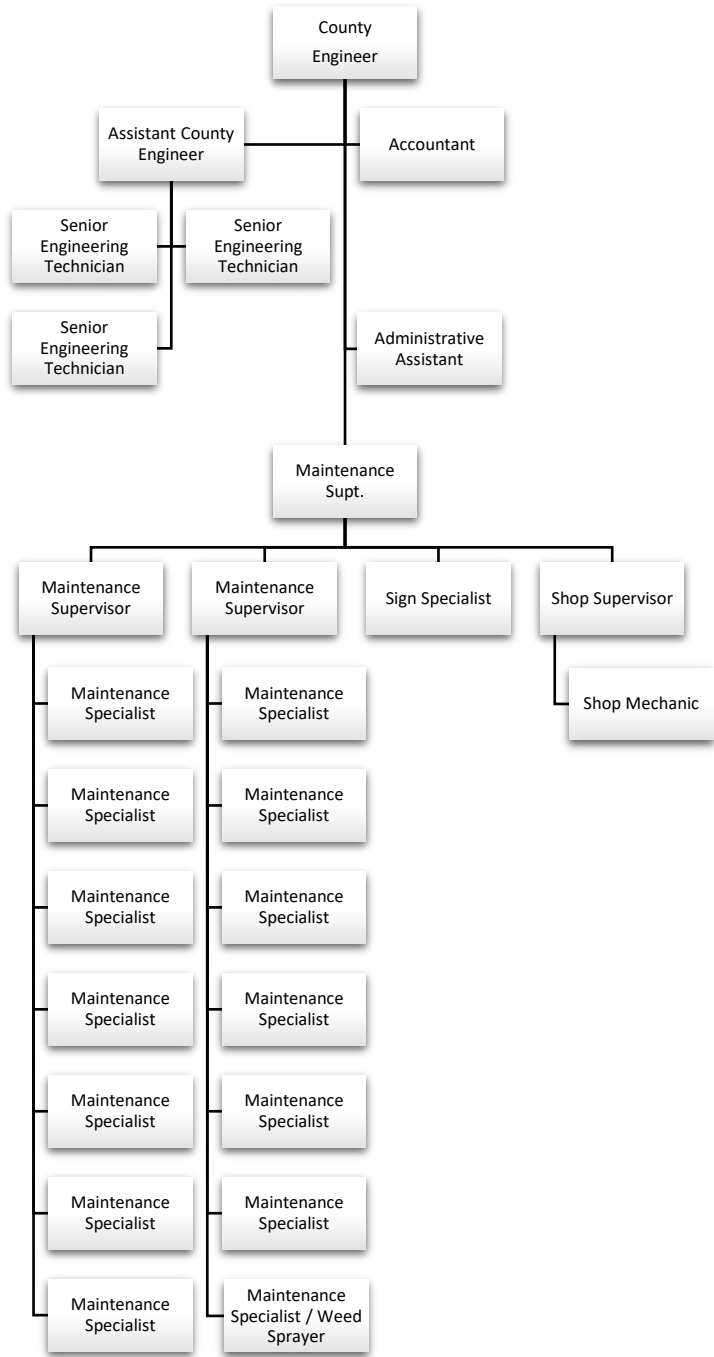

Revenue from motor fuel tax, vehicle registration tax, vehicle sales tax and automotive parts sales tax is distributed by the State of Minnesota to Redwood County to assist in the construction and maintenance of the County State Aid Highways (CSAH) and bridges on this CSAH system. The local property tax levy, wheelage tax, and local option sales tax are sources of funding for the construction and maintenance of all county roads and bridges. State and federal bridge bonds supplement funding of bridge replacements. Additional federal funding sources vary by year and applications are completed to pursue these additional funds whenever possible.

This plan lists the projects the Department intends on completing in the next five years based on current and projected funding. The plan is intended to be flexible, recognizing road and bridge priorities may shift due to rapid changes in highway and bridge conditions, public input, goals, priorities and budget constraints.

Highway Department Organizational Chart

Funding Sources

There are several sources of funding for road and bridge improvement projects and maintenance. Some of these sources require a local cost share but bring significant funds into the improvement program. The sources include:

Road and Bridge Tax levy

County funds generated by property taxes. Redwood County uses these funds exclusively for roadway maintenance.

County State Aid Highway – Regular Construction and Maintenance

State aid funding is administered by MnDOT’s State Aid for Local Transportation Division. CSAH funds can be used towards assisting in road construction, improvements and maintenance of highways on the state aid system (Minnesota Statutes 162.02).

County State Aid Highway - Municipal

CSAH Municipal funds can be used towards road construction, improvements and maintenance of highways on the state aid system (Minnesota Statutes 162.08) located in cities having a population of less than 5,000.

State Bridge Bonding & Township Bridge Funds

The Local Bridge Replacement Program (LBRP) provides local agencies funding for the reconstruction, rehabilitation or removal of bridges and structures. The program is financed primarily by specific legislation allocating general obligation state bond funds under Minnesota Statutes 174.51 and is administered by MnDOT’s State Aid for Local Transportation Division. Typically bridges on CSAH routes are funded at 50% and bridges on County Roads are funded at 100%. Road approach costs on CSAH and County Road bridge projects are the responsibility of each County. Township bridges are funded at 100% except for a local cost share of \$20,000 by the township. Townships are also responsible for right-of-way acquisition.

Wheelage Tax Revenue

The wheelage tax is a tax added to a vehicle registration fee. The Redwood County Board of Commissioners approved the wheelage tax beginning in 2018 to fund needed transportation projects in accordance with Minnesota Statute 163.051.

Sales Tax Revenue

In 2019, the Redwood County Board of Commissioners approved a 0.5 percent transit sales and use tax in accordance with Minnesota Statute 297A.993. These revenues fund road improvements as identified in the Redwood County 5 Year Road and Bridge Plan.

Highway Safety Improvement Program

The Federal Highway Safety Improvement Program (HSIP) goal is to significantly reduce traffic fatalities and serious injuries on all public roads and roads on tribal lands. Federal HSIP funding is distributed to each MnDOT district based on the proportion of fatal and serious injury crashes occurring in the district. Counties can then apply for these HSIP funds in their district.

Additional Federal and State Funds

Federal aid funding may be used by states and local agencies for preservation, reconstruction or construction on any federally eligible highway, bridge/tunnel, pedestrian/bicycle facility, and transit capital facility. Additional state funding includes programs such as the Local Road Improvement Program, which is legislatively financed. These federal and state funds are competitive in nature and must be applied for.

Funding Projections

Redwood County is projected to receive \$97.1 million dollars in state and federal funds, state bridge bonds, local bonds, sales tax and wheelage tax revenue for road and bridge construction between the years 2025 and 2030.

Funding Expenditures

Redwood County has \$96.7 million dollars of projects planned between the years 2025 and 2030, which includes 86.6 miles of roadway improvements and 37 bridge projects. Of the 37 bridge projects, 23 are currently unfunded. Once construction plans are complete, funds can be applied for.

Unfunded Road and Bridge Projects

Redwood County needs an additional 32.7 miles of roadway improvements, with a projected unfunded cost of \$15.5 million dollars. There are 27 county bridges and 25 township bridges that need replacing at a cost of \$43.0 million dollars. The Highway Department can responsibly pursue funding for 37 of the 52 bridges in the next five years. **Redwood County's total unfunded road and bridge reconstruction needs are valued at \$58.5 million dollars.**

Acronyms and Definitions

Average Daily Traffic (ADT)

The bi-directional estimate of total vehicles traveling on a road segment during a 24-hour period.

County Road (CR)

Roads locally maintained by the county highway department, but not part of the County State Aid Highway system.

County State Aid Highway (CSAH)

County roads dedicated as part of the state aid system. County State Aid routes receive authorized financial support from the County State Aid Highway Fund.

Functional Classification

Roads are organized into Functional Classifications according to the type of service they provide. The two services a road can provide are mobility from one point to another and access to adjacent land.

Arterial: Roads that provide for a faster or more direct mode of travel, but have less access to adjacent land.

Collector: Roads that gather traffic from local roads and funnel to the arterial network. These roads balance both traffic circulation and land access roles. Most Redwood County roads are collectors.

Local: Roads that primarily serve to provide access to adjacent land.
